

ADVANCED PROTOCOL: ACCELERATOR + BASE2 + Retinol POWER Booster

PROTOCOL

You may ONLY proceed to BASE2 treatments after you have completed a series of BASE1 skin-conditioning treatments including skin-conditioning home care products for the appropriate time frame based on clients Fitzpatrick and skin sensitivity. (Use of Vitamin A: Intense regularly is required). *Follow state board exfoliation laws.

1. Secure hair off face.
2. First cleanse with Dermodality cleanser to remove any make-up. (Foaming Cream Cleanser for normal, aging, dry or dehydrated skin / Beta Hydroxy Cleanser for oily or acne skin).
3. Second cleanse with Dermodality (gel-based) Mandelic & Green Tea Cleanser to prepare for peel.
4. Note: Be sure to have done a mask or any other in-office service PRIOR to proceeding to next steps.
5. Prep skin with Dermodality 50/50 Peel Prep Pads; thoroughly wipe face.
6. Apply petrolatum (or another occlusive of choice) lightly, to any areas of the face that need protection (cuts, abrasions, moles, tattoos, inner lining of nose and corners of mouth etc).
7. Have a fan for client nearby.
8. Have a timer nearby.
9. Measure 1cc (1/10 tsp) of desired BASE1 peel solution into a small glass bowl; *You may need more for neck and décolletage.
10. Apply BASE1 peel with a fan brush starting with the thicker areas of the skin. Proceed in the following order: Forehead, chin, facial perimeter, cheeks, nose, temples and around eyes.
11. Allow BASE1 peel to absorb into the skin. This usually takes about 3-5 minutes. Use a fan to cool the skin and help dry.
12. Measure ½ tablespoon of Dermodality Pumpkin Peel ACCELERATOR. *You may need more for neck and décolletage.
13. Apply Pumpkin Peel DIRECTLY OVER BASE1 peel using a fan brush starting with the thicker areas of the skin first. Forehead, chin, facial perimeter, cheeks, nose, temple and around the eyes.
14. Leave both peels on for another 5 minutes. *Total time for both peels is 8-10 minutes.
15. Wet fingertips and re-wet the Pumpkin Peel in light circular motions for an easier removal process. *Clients may feel some activity at this point. Tone skin with Dermodality Mandelic Toner to ensure product is removed completely.
16. Prep the skin once more with Dermodality Prep Pads. Thoroughly wipe face.
17. Measure 2cc (1cc=1/10 tsp) of BASE2 solution into a small glass bowl. *You may need more for neck and décolletage.
18. Apply BASE2 peel with saturated woven gauze starting with the thicker areas of the skin. Proceed in the following order: Forehead, chin, facial perimeter, cheeks, nose, temples and around eyes. *Apply pressure when applying.
19. Fan skin for 3-5 minutes watching for the first sign of frost. **A.** If you see frosting anywhere on the face proceed to step 20. **B.** If a frost does not appear and the client is not experiencing extreme discomfort proceed with the second layer in the same fashion. *We do not recommend more than 3 layers MAX & you must wait 3-5 minutes in between each layer. *You will need more BASE2 solution for each layer.
20. Measure 2-3 pumps of Dermodality Retinol POWER Booster into a glass bowl and apply to the face using a fan brush in gentle strokes. Let it absorb into the skin for 5-10 minutes before moving to Step 21.
21. Apply Moisture Soothe Plus; be sure clients skin has cooled down so as to not create an occlusive barrier.
22. We do not recommend SPF during this treatment as it will create an occlusive layer that may potentially damage the skin. Advise client to stay indoors, wear hats, etc for 24 hours.
23. Send client home with post-care instructions and a Dermodality post care kit.
